Summer 2013

Susquehanna Bank Digs Summer Reading and Music!

Susquehanna Bank Branch Manager and Assistant Vice President, Stefanie J. Myer, and Branch Relationship Manager, Nicole Danz, recently presented a check for \$5000 to Lititz Public Library Director, Susan Tennant in support of the 2013 Summer Reading Program and the monthly music concert series at the library.

Myer stressed, "Susquehanna Bank is pleased to support the Lititz Public Library, which enriches the whole community through various outreaches that touch every aspect of people's lives. Fellowship, literacy, education, and access to the arts are just a few ways the Library supports our local community, and we appreciate the opportunity to participate!"

Pictured above with Tennant, Myer and Danz is young library patron, Sadie Landis, and her mother, Jennifer Schofield. Both are delighted with Susquehanna Bank's support of early learning and lifelong cultural enrichment.

OverDrive Read

Read eBooks on your computer, tablet or mobile device with a modern web browser

Earlier this year, the Wall Street Journal reported that devices dedicated for reading eBooks (Kindle or Nook, for example) have been popular for the past six years, but the shrinking sizes and falling prices of full-featured tablet computers are now giving them a run for their money. According to a recent Pew Research Center report, people are more and more likely to read eBooks on tablet computers rather than e-readers.

Following suit with this trend, OverDrive has rolled out a new format: OverDrive Read. All that is needed to read is a computer, tablet, or mobile device with a modern web browser. This new format allows users to read eBooks, online and offline, without downloading the book or installing software. OverDrive Read hasn't changed the way the existing service works; it just provides another option. (Note: If using Internet Explorer, it may be necessary to download the Google Chrome Frame Plug-in. It's free and only takes moments to install.)

So how does OverDrive Read work? Once a title is borrowed, click the Read button next to a supported eBook on the bookshelf to open it in a new tab or window. To read offline in on a browser, just open the title and then add it to favorites or bookmark it in the browser. The nice thing about browser-based reading is that a reader's progression will sync across devices. For example, if a reader leaves off at page 47 on her computer, she can start at page 47 on her tablet. Additionally readers can find their next book fast with a filtered search, personalizing title recommendations and more. It's just like online shopping!

For more on how use OverDrive Read, go to the library's website at www.lititzlibrary.org and click on the Online Services page for a more detailed guide.
